Projects

AtliQ Hotel Data Analysis Project | Python, Pandas, Numpy, Matplotlib, Seaborn, Jupyter Jan 2026 - Feb 2026

- Built an end-to-end data analysis pipeline using Python and Pandas
- Cleaned and integrated multiple hotel booking datasets
- Created a unified analytical dataset using dataframe merges
- Generated visual insights on booking trends, occupancy, and revenue patterns
- Organized project using industry-standard data science repository structure
- Repository Link: <https://github.com/atermoiemment-1/Atliq-hotel-data-analysis>

Smart Attendance Monitoring System | Python, OpenCV, Face Recognition, Computer Vision, Machine Learning. Apr 2026 - May 2026

- Developed an AI-powered attendance monitoring system using Python, OpenCV, and Face Recognition technologies.
- Implemented real-time face detection and recognition to automate attendance tracking through webcam input.
- Designed a contactless attendance solution to reduce manual work and prevent proxy attendance issues.
- Integrated automated attendance logging with timestamp-based record management.
- Applied computer vision, image processing, and machine learning concepts in a real-world educational use case.
- Outcome: Built an end-to-end smart automation system demonstrating practical skills in AI, OpenCV, and real-time monitoring applications.
- Repository Link: <https://github.com/atermoiemment-1/smart-attendance-monitoring-system>

Certificate / Certifications

CSE and Advanced Technologies Sep 2024 - Oct 2025

IIT Mandi

<https://verify.masaischool.com/certificate/wLPRzGC2Yp>

Database Programming with SQL Aug 2023 - Sep 2023

Oracle

https://drive.google.com/file/d/1mkiebVMOgsTOxRV7iMAJqHKL-Ki2uAR_/view

Python : Beginner to Advanced for Data Professionals Jan 2026 - Mar 2026

Codebasics

<https://codebasics.io/certificate/CB-48-521130>

Java : Basic Feb 2026 - Apr 2026

HackerRank

<https://www.hackerrank.com/certificates/8c007ad3726a>

Skills

Languages Python, SQL, Java

Technologies/Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Flask, FastAPI, Git, GitHub, Jupyter Notebook, IBM Cognos Analytics

Domain Skills: Data Analysis, Machine Learning, EDA, Data Visualization, Data Preprocessing, Model Building, Dashboard Building, Report making, Problem Solving, Data Structures & Algorithms

Awards

Hackathon March 2023

Growth Ninja
